

MEGADYNE TOOLBOX

In an effort to improve communication as we integrate a broader range of products into our corporate portfolio, we have created the **MEGADYNE TOOLBOX**.

Located in Terminal Services and designed to assist with internal sales and customer service support, the **MEGADYNE TOOLBOX** will serve as an invaluable centralized resource for product and technical information, also offering downloadable sales training transcripts and materials from each "Go To Meeting" presentation conducted by Steve Facetti.

The **MEGADYNE TOOLBOX** icon will soon appear on your Terminal Services screen - simply click to open and access various folder content, including:

- Corporate Literature
- Competitor Data
- Corporate Directories
- Forms
- Technical Documents
- Training Presentations

MEGADYNE TOOLBOX

Information will be added to **MEGADYNE TOOLBOX** as it becomes available.

Please contact me with questions or issues pertaining to **TOOLBOX**.
