

# JASON FLORIDA WELCOMES NEW WAREHOUSE MANAGER

**Nick Rich joined Jason Industrial this past August as Warehouse Manager for our Tampa, Florida branch overseeing all daily warehouse functions and personnel. He is also responsible for overall management of Florida inventories pertaining to product shipping, receiving and stocking.**

A Florida native, he attended St. Leo University and is a graduate of Hillsborough Community College. Growing up in a metal shop, Nick worked for eight years with Alro Metals in Clearwater, where he was involved in all aspects of warehouse work, as well as customer service support. He then accepted a Warehouse Foreman position with Flow Components in Mulberry, Florida, giving him hands-on experience with many Jason Industrial hose and coupling items; knowledge that aided tremendously with his transition to our company.

Growing up playing numerous sports, Nick was prospected at one time by the Boston Red Sox, but chose a different path that led him to a career for a time as a golf pro.

Nick is a great addition to the Tampa team. Please join me in welcoming him to the Jason Industrial family.
