

## **JASON WELCOMES NEW DIRECTOR OF ENGINEERING - HOSE & COUPLINGS**

**Effective May 15, 2017, Randy Foster has joined Megadyne Jason Industrial as Director of Engineering for Hose and Coupling Products.**

Randy comes to us with 35 years of Industrial and Automotive experience with Dayco and Fluid Routing Systems (FRS), including nine years as Director of Product Technology for Dayco's N.A. Aftermarket. He brings with him a solid background in Hydraulic hose and coupling design, as well as application engineering for all hose products.

Developing new products and programs throughout his extensive career, Randy holds forty-five patents covering hydraulic couplings, hose design, automotive products, and belt design.

Having traveled extensively working with production factories and customers, he will be supporting our sales departments with engineering support, especially as it relates to hydraulics and its introduction later this summer; the initial focus on developing our hydraulic training.

Randy holds a Bachelors degree in Mechanical Engineering from the University of Missouri-Rolla. Randy and his family will reside in Strafford, Missouri, where he enjoys spending time with them and tinkering with cars, especially the 1967 Mercury Cougar he restored. He will be in the Carol Stream office on a regular basis, where he is currently spending time this week learning Jason products and procedures.

With his knowledge and background, Randy is a highly valuable addition to our Hose & Coupling team. Please join me in welcoming him to the Megadyne Jason Industrial family!

Roy L. Pyle
