

MINI BALL VALVES

AVAILABLE NOW!

APPLICATIONS:

Used in those applications where space is limited. These fittings are intended for general purpose applications and for use in fully open or closed positions. Throttling of these mini ball valves, depending on the conditions involved, may cause premature failure or cause the handles to stick.

For use in manufacturing plant plumbing that require total shutoff ability. Used in water and air lines to and from capital equipment.

FEATURES:

- Valve body is plated brass
- Temperature range up to 150°F (66°C)
- Handles working pressures up to 150 PSI
- Available in 1/8", 1/4", 3/8" and 1/2" sizes

Size	Part No.	Port Type
1/8	MBV018BS	Standard
1/4	MBV025BF	Full
3/8	MBV038BF	Full
1/2	MBV050BS	Standard

Female NPT x Female NPT
